

ARGENTINE HERO HEADS MARINES

Washington, D. C., June 19.—Appointment of Maj. Gen. John A. Lejeune to be major general commandant of the marine corps, succeeding Maj. Gen. George Barnett, was announced today by secretary Dandridge. Gen. Lejeune commanded the famous second division when it broke the German line in the Meuse-Argonne offensive, and the secretary said his appointment to command the marine corps was in line with the policy of the department to reward the officers who served with distinction in the war.

DESERT POWER & WATER CO. ASKS INCREASE IN RATES

Phoenix, Ariz., June 19.—The Desert Power and Water company, furnishing power to the Sun, Reed and United Eastern mines in Mohave county, asked for an increase in rates at a hearing yesterday before the state corporation commission. The company's representatives of the company said it was operating at a loss. They stated that discounts on large quantities of power were being furnished to the mines at something less than a profit. The company said it was charging the mines 1.5¢ a kilowatt whereas the actual cost, including depreciation, was 2.3¢ a kilowatt. High labor cost and the advance in price of oil were mentioned as contributing factors. The commission did not enter an order at the conclusion of the hearing.

DIDN'T KNOW 'T WAS SO GOOD

Texas Lady Storekeeper, Who Carries Black-Draught in Stock, Has Found It "Best Liver Medicine" Obtainable.

Barker, Texas.—Relating her experience with Theodor's Black-Draught, Mrs. A. L. Promme, of this place, says: "I had for some time used . . . and other liver medicines, which would nauseate and make me feel bad. We have a store, and our customers called for Black-Draught so often I decided it must be good, so thought I would try it myself."

"I began its use and found it just fitted my case. It neither gripped nor nauseated me, was an easy laxative and not hard to take."

"I had had headaches a great deal, no doubt from torpid liver. The Black-Draught would cure them. The best way I find to take Black-Draught is to take one or two good sized doses until the liver begins to act, then taper the doses to just a pinch after meals."

"It will insure good digestion, do away with the gas or bad taste in the mouth, and is without doubt the best liver medicine in the market. I have found it so. I can recommend it to my friends, for I believe it will do them good."

Get a package of Theodor's Black-Draught liver medicine today. Most dealers carry it in stock. Adv.

TEXAS OIL MAP FREE

An authentic, five colored, geological map of the State of Texas, showing oil fields, oil wells, oil roads, etc., etc., has just been issued and is now being sent to you absolutely free upon request. Write today and ask for any information you desire. GILBERT JOHNSON & COMPANY, For 10 Years Oil Operators and Refiners, 2001 Main St., Ft. Worth, Tex.

YOUR CHANCES

Of Losing On Your Texas Oil Investment

Shown by Our \$10,000 Statistical Map. Experts have been busy for weeks preparing the most complete Geological and Statistical Map of Texas ever compiled. This Map is Now Ready For You. It Costs \$10,000 to Prepare and Is Worth It

On the face of the map, which measures 15x24 inches, are shown geological surface structures, with brief explanation of their character in every-day language. All known oil and gas fields, accurately located, with average production of each field. Location, size and ownership of all refineries operating or under construction. Location of all principal pipe lines and ownership. Railroad, county lines and principal towns. On the reverse side appear the following tables and charts: Table showing increase in crude oil and gasoline consumed and number of automobiles in use from 1910 to 1918, inclusive. Chart showing increase in production of crude oil from 1910 to 1918, inclusive, comparing production of United States, Texas and the world. Table showing number of wells drilled and number producing for each field, from 1912 to July 1, 1919. Table showing approximate production for each of the principal Texas fields in 1918 and first five months of 1919. Table showing dividends paid by principal North Texas companies from date of organization to March, 1919, inclusive; also dividends paid by large, old-established oil companies over a long period of years.

Main Pool Now Believed Found At Sipe Springs

Dallas, Texas, June 19.—The new 400 barrel well of the Atlantic Oil Producing company, three miles north of Sipe Springs, was a feature of the present week. It is the Luck No. 3 and has been flowing by heads of one hour each with the drill in the top of the sand picked up at a depth of 2581 feet. Larger production is expected before the well is completed. This well promises to be the largest producer in the district, and, as it is situated on the extreme eastern edge of the field, operators are confident that the main pool has been found.

A 2000 barrel well has been brought in southwest of Breckenridge by the Iker Oil company on its Wragg lease. The well played the time at 3112 feet before the well is completed. It is the largest producer southwest of Breckenridge.

In the Deadwood district an 800 barrel well has been brought in on the Dabner lease of Gallagher and Lawson. It is the No. 3 on the property and is producing from a depth of 2800 feet.

In the Gunter district the Tex-Peco Petroleum company has brought in a giant gusher on the J. M. Wright lease, south of Pecos, and Domingue River No. 1, spudded in Friday at 2500 feet, block 25, H. & T. C. The drill is six inches in the sand and considerable oil showings have been encountered.

Northwest of Somervell, in the San Antonio district, the Arrowhead well is standing full of oil. The discovery was made after the rig had been moved from the ground preparatory to abandoning the hole. The oil flow is being hindered by a lost bit.

A promising well has been brought in five miles northwest of Glaco by the Gulf Production company on the Ray lease. It is flowing by heads at the rate of 400 barrels daily from 2000 feet. Preparations are being made to sink the well in the hope of increasing its production.

STANDARD RIGS SPUD IN THIS WEEK IN PECOS FIELD

Pecos, Texas, June 19.—Two standard rigs spudded in the Pecos field this week, according to the

Hogwallow Locals

By DUNK BOTT.

LAB HANCOCK was among those present at a protracted meeting in the Cal Ribs neighborhood one night last week. He reports that he saw an old fellow get up and make a talk as long as your arm, and right then everybody in the meeting knew he had been feeding his mule on corn shucks all winter.

Fletcher Hensley says barbers are not near so entertaining in the spring and summer, the adons they eat each day seems to make them drovy.

Cricket Hicks has an awful cold this week. He don't know how he caught it unless it was by sitting too close to Miss Flattie Belcher's right thin dress in church last Sunday.

SERVICE CO. TO RUSH WORK

Under date of June 16, the following telegram, addressed to J. E. Quaid, El Paso, from J. W. Amyx at Shreveport, La., has been received at the office of the Service Oil corporation:

"Drilling operations Pine Island, which were delayed by break Red river before, now under way. Have made locations and let the contracts. Rig builders now working on derricks and machinery in being hauled to locations."

According to J. E. Quaid, president of the company, the policy of the management has been to hold up its drilling campaign in Louisiana until the rainy season was over. Now that weather conditions are about normal, drilling will be pushed vigorously, he said, to develop the acreage of the company, particularly in the Pine Island and Bull Bayou fields. This work will be supervised by Mr. Amyx, field superintendent of the company.

Pecos chamber of commerce. The El Paso Saragosa started drilling Tuesday in section 22, block 13, H. & T. C. N. survey, south of Pecos, and Domingue River No. 1, spudded in Friday at 2500 feet, block 25, H. & T. C. The drill is six inches in the sand and considerable oil showings have been encountered.

Northwest of Somervell, in the San Antonio district, the Arrowhead well is standing full of oil. The discovery was made after the rig had been moved from the ground preparatory to abandoning the hole. The oil flow is being hindered by a lost bit.

Student Sells 11 Pints of His Blood for \$600

Baltimore, Md., June 19.—A robust student in the Johns-Hopkins Medical school, who has eleven punctures in his left arm, from each of which came about 500 cubic centimeters (one pint) of perfectly good blood, is "still going strong."

When the American Indian was pushed back by the white man, Uncle Sam allowed him to rest on the then worthless plains and in the forest of the hunting ground, that the Red Man's white brother might till the fertile soil. Most of the rich oil fields of Oklahoma and the Texas Panhandle were on the worthless scrub hills of the Indian nation. The Texas ranch owner and farmer left the sage brush plains and arid hills untouched. The state gave the refuse to the university and school system and unjustly and nature lavishes her wealth where least expected and the oil, gas and mineral resources of these school lands are building fortunes for those who come and take them for development, and now the state, the university and the public schools are reaping the fabulous riches the early settlers pushed aside. This is one of the strange things where nature takes care of her own and it is all very well because it gives the chance now we could never have gotten otherwise.

CHARGES RATES OF TELEPHONE COMPANY ARE UNREASONABLE

Phoenix, Ariz., June 19.—A protest against the charge of \$2.50 for each telephone installed in addition to the expense of installing wire between a switchboard and each of 150 or more stations, was contained in a complaint filed yesterday with the corporation commission by Hal C. Bird, of Phoenix, charging the Mountain States Telephone and Telegraph company with maintaining unreasonable, excessive, arbitrary and unjust rates.

Bird is the lessee of a hotel being erected here. His complaint stated that when he applied to the telephone company to install a switchboard and telephone connections in the hotel, the company required that he enter into a contract at a rate which Bird claimed was in excess of rates established by the commission.

ASKS LOWER VALUATION ON ARIZ. COPPER CO. PROPERTY

Phoenix, Ariz., June 19.—More than \$1,000,000 reduction in the valuation placed on property of the Arizona Copper company in the Clifton-Merend district of Greenlee county was asked yesterday of the state tax commission by J. G. Cooper, cashier of the company. The valuation had been placed tentatively at \$25,000,000 and in requesting a reduction, Cooper presented figures on last year's production and cost of production.

Last Man Rush for State Wealth in Texas Oil

University and State School Land Oil Riches Open to Rich and Poor, But Certain Not to Last Long, Under Easy Terms Now Offered Through Abner Davis.

Now Or Never For 40 Acre Texas Oil Rights

100 Wells Drilling

I am absolutely certain that a choice 40-acre lease will net the lucky owner from 40 to 400 times the present cost within a few weeks or few months according to when gushers come in. More than 100 wells drilling to enhance values in the trans-Pecos Rio Grande district, where most university and school land is situated.

Strange But True

When the American Indian was pushed back by the white man, Uncle Sam allowed him to rest on the then worthless plains and in the forest of the hunting ground, that the Red Man's white brother might till the fertile soil. Most of the rich oil fields of Oklahoma and the Texas Panhandle were on the worthless scrub hills of the Indian nation. The Texas ranch owner and farmer left the sage brush plains and arid hills untouched. The state gave the refuse to the university and school system and unjustly and nature lavishes her wealth where least expected and the oil, gas and mineral resources of these school lands are building fortunes for those who come and take them for development, and now the state, the university and the public schools are reaping the fabulous riches the early settlers pushed aside. This is one of the strange things where nature takes care of her own and it is all very well because it gives the chance now we could never have gotten otherwise.

CHARGES RATES OF TELEPHONE COMPANY ARE UNREASONABLE

Phoenix, Ariz., June 19.—A protest against the charge of \$2.50 for each telephone installed in addition to the expense of installing wire between a switchboard and each of 150 or more stations, was contained in a complaint filed yesterday with the corporation commission by Hal C. Bird, of Phoenix, charging the Mountain States Telephone and Telegraph company with maintaining unreasonable, excessive, arbitrary and unjust rates.

Last Chance for Big Oil Lease Holdings From the State

The Indian wards of the government have become fabulously rich from their oil lands in Oklahoma.

Help Produce Gasoline

My extensive operations in oil leases, drilling wells, producing,

Refineries: Fort Worth, Pecos, Wichita Falls

ABNER DAVIS SYSTEM

Developers, Producers, Refiners, Pyramid Petroleum Products

FORT WORTH, - - TEXAS

TEXANS WAKE UP—

You have been asleep while the vast wealth in University and School Land Lease-Permits have been taken up by a few people and combinations. I have secured the choice of all these state permits in the trans-Pecos-Rio Grande district, and offer you a chance to own 40 acres or more, and share with me in the development of that great stretch of oil territory now being proven up by more than 100 deep tests and hundreds of shallow wells.

The state, through your legislature, gave every man in Texas the first opportunity, but it was too easy for you to bother with then. It will be too late for you to get in unless you act now.

Texas' Last Great Gift to Man

Her Vast Oil Wealth for School Fortunes Await Developers, and Millions for the Early Speculators.

Abner Davis, Texas Oil Developer, Refiner and Founder of the famous Abner Davis System of Profit-Sharing. Man to Man is now distributing to his backers 400,000 acres of university and school land oil lease-permits from the state of Texas.

This is without doubt, the largest co-operative profit-sharing plan for individuals in the history of all efforts at constructive individual co-operation.

Why Pay More

If you want a dollar to do more for you than a thousand times that amount could do after one of the hundred big wells now drilling comes in a gusher further extending and proving the trans-Pecos-Rio Grande oil trend, you will have to get your application in my hands for oil lease-permit allotment on Texas school land.

By co-operating with me you get the largest holdings for the least expense—Why pay more?

Forty acres at \$1.25 per acre—can be secured through Abner Davis, Trustee.

400,000 acres Texas university and school land oil and gas lease-permits, titles perfect—easy terms—state protection, blocked up covering trans-Pecos-Rio Grande trends where geologists and state surveyors give unanimous approval for oil development.

Help Produce Gasoline

My extensive operations in oil leases, drilling wells, producing,

Share on Ground Floor

I could charge you \$10 per acre now, or could hold for 30 days and charge \$20 to \$10 per acre, but that is not my way of doing business, man to man—I want these vast holdings to come into the hands of my friends who will co-operate with me for future developments at nominal expense with profits direct to the individual from their acreage and then from co-operation and development under our system.

I am not selling leases, but I am building a great organization for profit-sharing.

Would You Win Back Your Losses if You Could?

You may have tried to win in oil and lost, but I can promise you these school land oil and gas lease-permits now to be had practically free, will give you the biggest chance to win big with the least chance for loss of any oil investment on earth.

Would You Save \$10 a Month for Million in Lump?

You are here given the real chance to win quickly and in a substantial way because big holdings can be had with only a few dollars cash and a few dollars for annual rentals and extension.

What Forty Acres of Oil Land Can Do

Forty-acre Tract Produced \$7,000,000 in Oil.

By International News Service. RANGER, June 11.—The 40-acre tract adjoining Merriam church property, four miles south of Ranger is the world's richest oil acreage.

It has produced in less than two years nearly 2,500,000 barrels of oil worth over \$7,000,000 at present prices.

DO YOU WANT YOURS?

40 Acres Oil, Gas and Mineral Lease-Permits on University and School Lands in Texas.

The very last chance you will ever have. There is no more land being created. There is no more oil being deposited. But Texas has a beautiful supply for all who have the nerve to try. I am determined that my friends and backers shall have the greatest chance for real wealth that ever came to so many people through the efforts of one man.

There is no other way on earth by which this opportunity to distribute 400,000 acres of Texas oil and gas lease-permits on school lands could have ever come into my hands except because my friends have enabled me to climb to a strong position as an oil developer and refiner. This confidence is due to the tangible results of my efforts along constructive development lines in a few short years.

So if I can turn 40 acres of Texas oil and mineral rights over to each of 10,000 people, I will have given to my friends the very thing their backing brought me.

I do not believe there is another opportunity like this or

Benefits of Co-operation

The development carried on by the drilling branch of the trust-ship makes wealth for the participating members direct. This same development enhances the value of all individuals without expense to them and without expense or injustice to the developing department.

To illustrate—If I go out and buy 99 acres or a section of 640 acres for development, I use the funds of the drilling branch of the trust-ship and thereby create great values for outsiders who own the adjoining and surrounding eighth and sixteenth sections. Because incidentally I am developing and creating further values for all the other individuals who have adjoining or surrounding property.

Title Perfect With State Protection

An oil and gas permit on university or state school lands in Texas is the ideal form of speculation in a large way with a very little money under the plans outlined whereby people everywhere may become interested in the vast petroleum deposits of Texas state lands, regardless of where they live.

If you are interested write me to reserve 40 acres for you. Give your address and full details will be sent you special delivery.

TELEGRAPH ME YOUR RESERVATION.

Every man, woman and child that has ever invested a dollar through me, who is an American citizen, can secure an allotment of 40 acres of oil and gas lease-permits on Texas school land by sending to pay \$1.25 per acre cash. This offer is made direct to those who have furnished me money in the past which enabled me to secure the vast university and school lease-permits I now have at my disposal.

Please reserve for me . . . acres of the University or state school land lease-permits. Enclosed find \$. . . to apply to same. It is distinctly understood that your plan contemplates complying with the laws of the state of Texas governing the payment of rental and the grouping and development of oil land for oil and gas.

Address . . . Name . . . You may remit any amount convenient from \$10 up the balance to follow when you receive full details. All applications and all money will be returned when the allotment is exhausted. The allotment will be made in the manner in which application is received.

Suite V-16, Fort Worth, Texas.

LETTERS TO THE HERALD

FINDS BROTHER. Editor El Paso Herald: I want to thank you for your kindness to me in locating my brother, Walter Gaynor, whom I have not heard from in years. I received a letter the day after I received your kind letter, telling me where he was living. Again I thank you.

Miss Emma Hessler, Box 521, El Paso, Ariz.

DEPLORES BLOCKING OF PARADE. Editor El Paso Herald: In this hour of intense talk relative to Americanism and patriotism, it is not proper that we should call to task those who constitute the backbone of our nation? It was, indeed, a disgrace for a freight train to break a parade which was all meant loyalty to our flag. We have in our midst a large number of foreign born and foreign bred, but they are not American. I am only speaking as a citizen who owes the United States much. I myself was born on foreign soil, although I love America, for it is the only country I know.

Loada Billa, 215 West Rio Grande.

SCRATCHLESS. Editor El Paso Herald: I notice from reading The Herald of June 16 that a Christian Science lecturer says that all soldiers of the faith, that went through the great war, came back scratchless after having the dangers of German submarines and facing shells, bullets, gas, etc. It is too bad that the whole American expeditionary force was not Christian Scientists; then we could have won the war without losing a single man or shedding a drop of blood on the battlefield.

I am one of the survivors of the 16th Infantry, first division and was in the Montfleur-Noyon defensive line in the Meuse-Argonne offensive, and faced all that the Christian Science

more, etc. Therefore, it is not my purpose to belabor the company with undue requests or demands in the public interest, but there is one thing I feel certain the public would approve. Out at the end of the Government Hill line there is a small soda water stand. If you will sit under the porch of the soda water stand between 8:30 and 9:30 a. m. and look toward the Herliem sanatorium, you will see coming, some crawling toward you a portion of the 40 or more war-rig tuberculosis and "lungers" afternoon nap. It's a hard trip for these disabled soldiers of the nation. Then, in the evening, you will find a steady file of Seventh Cavalrymen wending their way to the self same car. I have wondered whether some one could not appeal to the street car company, or to the council, or to the mayor, to have this car service extended just for a matter of four blocks, thereby making it easier for about 100 patients and some few hundreds of the Seventh Cavalry, not counting the many Mexican laborers that work every day in the adjacent sanatoria. I do not ask that the street car company extend its line to Fort Bliss proper; the expense of grading and excavating would be too great; but to extend the line just four blocks would be a practically level terrain, and be of tremendous benefit for all concerned. Semper Paratus.

AMERICAN CONSUL LEAVES ON EXTENDED EASTERN TRIP. E. A. Dow, American consul at Juarez, left El Paso Friday night on leave of absence that will extend over a period of several weeks. Mr. Dow will first go to Omaha, where he will join the members of his family, who are visiting friends there. Accompanied by his wife and children he will then go to Washington, D. C. where he will submit a report of conditions in northern Chihuahua to the state department. Mr. Dow expects to spend a greater part of his vacation in the Blue Ridge mountains of Virginia, where he will be in close touch with Washington.

state did in the war and came back scratchless. Rufus B. Freeman, Meek Co. D, 15th Infantry, Camp Tusco, El Paso, Texas.

ASKS CAR LINE EXTENSION. Editor El Paso Herald: The street car company has given El Paso excellent service, taking into consideration the shortage of labor, shortage of materials, the 5 cent fare when other cities are paying so much more.

WILL RADIUM AT LAST OPEN THE DOOR OF THE GREAT UNKNOWN?

If you are sick and want to get well and keep well, write for literature that tells how and why this almost unknown and wonderful new element helps relief to so many sufferers from Rheumatism, Sciatica, Gout, Neuritis, Neuralgia, Nervous Prostration, High Blood Pressure and diseases of the Stomach, Heart, Lungs, Liver, Kidneys and other ailments. You wear the Degenes Radio-Active Solar Pad day and night, receiving the Radio-Active Rays continuously into your system, causing a healthy circulation, overcoming sluggishness, throwing off impurities and restoring the tissues and nerves to a normal condition—and the next thing you know you are getting well.

Sold on a test proposition. You are thoroughly satisfied it is helping you before the appliance is yours. Nothing to do but wear it. No trouble or expense, and the most wonderful fact about the appliance is that it is sold so reasonably that it is within the reach of all, both rich and poor.

Before you matter how bad your ailment, or how long standing, we will be pleased to have you try it at our risk. The full information writes today—ask, tomorrow. Radium Appliance Co., 550 Broadway Bldg., Los Angeles, Calif.—Adv.

Don't Look A Gift Mule In The Heel

Editor El Paso Herald: I want to thank you for your kindness to me in locating my brother, Walter Gaynor, whom I have not heard from in years. I received a letter the day after I received your kind letter, telling me where he was living. Again I thank you.
